Supplements Accelerate Benzodiazepine Withdrawal: A Case Report and Biochemical Rationale
by W. Todd Penberthy, PhD, and Andrew W. Saul

Notes
3. Lapin IP. Nicotinamide, inosine and hypoxanthine, putative endogenous ligands of the benzodiazepine receptor, opposite to diazepam are much more effective against kynurenine-induced seizures than against pentylenetetrazol-induced seizures. Pharmacol Biochem Behav. 1981;14(5):589–593.

Nutritional Medicine is Orthomolecular Medicine
Orthomolecular medicine uses safe, effective nutritional therapy to fight illness. For more information: http://www.orthomolecular.org
