In this 7-year clinical study, 400 eyes with AMD, 78% of the eyes showed from 1-9 lines of improvement in reading of the visual acuity chart; Over 50% improved from 2-9 lines; 2 patients with

retinal vein occlusion and swelling of the macula had dramatic improvement in vision.

36. Reader AL, Halloran, G. Bioelectrical Stimulation in an Integrated Treatment for Macular Degeneration, RP, Glaucoma, CMV, and DR; Fourth Annual Symposium on Biological Circuits, Oct. 1997, Mankato University, MN. In a two-year study involving 114 patients, researchers investigated effects of microcurrent stimulation on patients with macular degeneration, retinitis pigmentosa and other retina problems. Of 18 patients with AMD, 16 showed improvement. Of 78 patients with retinitis pigmentosa, 62 showed improvement. Of 18 patients with other retinal problems, 16 showed improvement; 14 other patients showed no improvement, but their condition stabilized and did not get worse as expected. Two other patients continued to lose vision, but at a slow rate.

**Invigorate Your Mitochondria**

ATP 360™ is a complete mitochondrial complex, clinically researched to provide targeted support for...

**Mitochondrial Function**

- Proprietary phospholipid blend promotes a healthy membrane\*
- Antioxidants to support against oxidative stress\*
- Healthy membrane is essential for vigorous ATP production\*

**Krebs Cycle**

- Key nutrients to optimize Krebs energy production\*

**Mitogenesis & Membrane Potential**

- Provides nutrients for optimizing the electron transport chain\*
- PQQ to promote healthy mitochondrial mass\*
- Promote healthy mitochondrial formation\*

Researchers have noted that the inability of the body to properly process sugar, leading to advanced glycation (bonding of sugar molecules with proteins and other molecules), contributes to development of macular degeneration. This study concluded that the health of gut microbiota was a factor in the ability of the body to process sugars and that this ability was hampered in a high-glycemia diet.
